Never heard of Dixie Lead in Baton Rouge, we had a Dixie Metals in Heflin, which was remediated. I'll have to ask others; maybe it was a former name for something else.

John

Hi John,

Do you know anything about a historic secondary smelter site called Dixie Lead Company, with a mailing address of P.O. Box 1775, Baton Rouge, LA. It is part of a list of sites that are generating some interest from the press. I searched your databases (EDMS) and CERCLIS and RCRA and Envirofacts with no success. I also used doctor Google. There are 2 sites in LA, Dixie Lead Company and National Lead Company in New Orleans (EDMS lists its AI as 4150 but no records are available in EDMS). I am going to drive by the National Lead location when we go to Delta, just curious if you have any information on either site. Here is a link to the report that initially discovered these sites.

Hey Brenda, Dec 12 would be good for us. We can meet you there at whatever time you want.

John

Hi John,

We would like to go to Delta December 12, 13 or 14th-Please let me know what day works best for the state. If these dates do not work please let me know. We will be doing additional work on CERCLIS prescreens so we are flexible as to which of the days work best for you. Hope you are taking care of yourself and our mostly groovy.
